

# DuPont™ Personal Biosecurity Kit

PROVIDES ESSENTIAL TOOLS TO HELP REDUCE  
EXPOSURE TO AND SPREAD OF VIRUSES OR BACTERIA

## LIMITED WARRANTY FOR DuPONT™ PERSONAL BIOSECURITY KIT

DuPont warrants to the original purchaser that the enclosed DuPont™ Personal Biosecurity Kit will be free from defects in materials and workmanship when used as specifically provided in the enclosed Instruction Manual for a period of two years from the date of purchase. DuPont warrants that it will, at DuPont's option, replace the affected item in the kit free of charge or refund your full purchase price of the DuPont™ Personal Biosecurity Kit during the term of this warranty, provided you contact DuPont at 800-931-3456 or 302-774-1000, and that the affected portion of the kit is returned with postage pre-paid, with Product Return Number along with your proof of purchase showing the date of purchase. Other restrictions apply. See your retailer or go to [www.diseasepreparedness.dupont.com](http://www.diseasepreparedness.dupont.com) for additional warranty details.

Once one employee gets ill with a virus, they all can. That's why DuPont offers the Personal Biosecurity Kit. The kit contains items that will help keep your employees from transmitting viruses to each other, increasing the likelihood that your business will remain staffed and running.

The DuPont™ Personal Biosecurity Kit contains technologies chosen by medical and industrial hygiene specialists for their effectiveness and ease-of-use in helping to reduce the risk of viral spread among your employees. And this is the same kit chosen by DuPont as part of an overall safety and general preparedness program for human influenza. A legacy of experience in safety and protection, along with premium hygiene and disinfection products, enables us to bring you tools to use as you design your overall readiness plan.

**DUPONT™ PERSONAL BIOSECURITY KIT**  
 HELPING TO REDUCE EXPOSURE TO VIRUSES AND OTHER PATHOGENS IN THE WORKPLACE

**DuPont™ Personal Biosecurity Kit:**

Digital Thermometer

Surgical Masks

DuPont™ Antiseptic Hand Spray

DuPont™ RelyOn™ MDC

Nitrile Gloves

Travel Bag

In today's world, the threat of communicable disease is all too real. Many companies and organizations are already making contingency plans. A key element of any such plan is controlling the spread of viruses or bacteria that cause disease. Used properly, the DuPont™ Personal Biosecurity Kit can help reduce your employees' exposure to a broad range of human pathogens.\*

**Helping your employees.**

Shaking hands with a client. Opening a door. Standing in a crowded elevator. These seemingly ordinary occurrences can spread a virus that may cause disease among your workers. While you shouldn't panic at this prospect, you also shouldn't ignore it. This convenient kit can help limit the transmission of infectious viruses among employees. Each kit comes with **1 Digital Thermometer**. This allows your employees to monitor their body temperature (usually the first indicator of infection) before coming to work.

We also provide personal protective equipment, disinfectants and antiseptics to help reduce germs in the office:

**30 3-ply surgical masks** – Wearing these masks can help minimize the spread of viruses among your staff and help reduce the transfer of these viruses from someone with symptoms. The DuPont™ Personal Biosecurity Kit contains enough masks to last up to two weeks.

**2 oz. DuPont™ RelyOn™ Antiseptic Hand Spray** – Hand contact is a very easy way to transmit pathogens. Providing this antiseptic spray to your employees allows them a convenient means to sanitize

their hands when soap and water are not available. This will help reduce the spread of germs when the antiseptic is used after coming in contact with communal surfaces like doorknobs, faucets, etc.

**0.18 oz. sachets of DuPont™ RelyOn™ Multi-Purpose Disinfectant Cleaner† (DuPont™ RelyOn™ MDC) and Spray Bottle**

– This hard nonporous surface disinfectant was chosen for its proven effectiveness against the influenza A virus, its long shelf life, as well as portability and compatibility with surfaces. Infectious diseases result from the rapid spread of viruses. For this reason it is critical to choose the right virucide and disinfectant. Remember, just touching a contaminated hard surface can spread some viruses. Keeping frequently touched areas as sanitary as possible is vital. DuPont™ RelyOn™ MDC can be used on items such as:

- Computer keyboards
- Doorknobs
- Tables and desks
- Light switches

As with all disinfectants, always read and follow the label instructions.

**2 Pair Nitrile Gloves** – For handling DuPont™ RelyOn™ MDC powder.

**Travel Bag** – When your employees leave the work site, this bag offers portability of essential kit elements. Employees should take their digital thermometer, DuPont™ RelyOn™ Antiseptic Hand Spray, and masks to wear the following day.

**Helpful Tips** – In the user guide included in the kit, we provide simple reminders to your employees about proper hand washing procedures, as well as other suggestions to help reduce the spread of bacteria and viruses. The kit also comes with detailed instructions for proper use.

**A name you can trust.**

DuPont has over 200 years of safety and protection expertise. And our protective apparel and fabrics have been safeguarding people from chemical and biological hazards for more than 20 years. Behind every kit is our knowledge of biosecurity management practices that help minimize disease transmission, combined with our expertise in safety and protection.

**Supported by experts.**

DuPont science and expertise is working for you in the engineering of the Personal Biosecurity Kit and instruction in its proper use.
